

ENVIRONMENTAL & SOCIAL ASSESSMENT

HSE210

COURSE TITLE**ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT****COURSE DATE/ VENUE****03rd - 7th November 2025****Rome, Italy****COURSE REFERENCE****HSE210****COURSE DURATION****05 Days****DISCIPLINE****Health, Safety and Environmental****COURSE INTRODUCTION**

This course provides comprehensive insights into evaluating and managing environmental and social impacts arising from development initiatives. It helps attendees understand the interaction between development projects and their surrounding environment and communities.

Using structured methodologies, participants will explore how to maximize positive effects and mitigate negative ones. The course encourages a balanced approach to decision-making, highlighting how organizations can generate value and sustainable outcomes while minimizing environmental and social risks.

COURSE OBJECTIVE

At the end of the program, attendees will gain the ability to:

- Understand environmental systems and contemporary issues like climate change
- Assess environmental and social consequences of development projects
- Apply tools and frameworks to manage environmental and social impacts
- Plan mitigation strategies using analytical and participatory techniques
- Incorporate public and stakeholder perspectives throughout the assessment process

COURSE AUDIENCE

This course is ideal for professionals involved in the planning, execution, or evaluation of development projects that may affect environmental or societal conditions. It will be especially useful for:

- Project Management Teams (managers, engineers, planners, coordinators)
- Business Development Professionals seeking sustainable growth strategies
- Strategic Planners responsible for long-term organizational goals
- Sustainability Officers aiming to enhance their practical knowledge

COURSE CONTENT

- Legal and institutional frameworks

Day 2: Public Participation and Project Screening

- Engaging stakeholders and the public
- Screening and scoping fundamentals
- Evaluation methods for ESIA preparation

Day 3: Environmental & Social Impact Analysis

- Tools for identifying and analyzing impacts
- Focus on solid waste management and assessment
- Developing integrated management plans

Day 4: Air and Water Pollution Assessments

- Pollutant types and risk assessment
- Water treatment procedures

Day 5: Mitigation and Future Strategies

- Principles of mitigation planning
- Social Impact Assessments and strategic frameworks
- Future trends in environmental and social governance

COURSE CERTIFICATE

TRAINIT ACADEMY will award an internationally recognized certificate(s) for each delegate on completion of training.

COURSE FEES

£5,500 per Delegate. This rate includes participant's manual, Hand-Outs, lunch, coffee/tea on arrival, morning & afternoon of each day.

COURSE METHODOLOGY

The training course will be highly participatory and the course leader will present, guide and facilitate learning, using a range of methods including formal presentation, discussions, sector-specific case studies and exercises. Above all, the course leader will make extensive use of real-life case examples in which he has been personally involved. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Case studies & Practical Exercises
- 10% Role Play
- 10% Videos, Software or Simulators (as applicable) & General Discussions
