

RESERVOIR MANAGEMENT & MONITORING

DRPT115
Drilling, Reservoir
& Geology

COURSE TITLE**RESERVOIR MANAGEMENT & MONITORING****COURSE DATE/ VENUE**

04th-08th Mar 24'

Amsterdam, Netherlands

COURSE REFERENCE

DRPT115

COURSE DURATION

05 Days

DISCIPLINE

Drilling, Reservoir & Geology

COURSE INTRODUCTION

The principles of sound reservoir management are presented with emphasis on practical applications.

Actual case histories are used to study both successes and failures. An interdisciplinary synergistic approach to efficient reservoir management is detailed with the goal of optimized profitability. The significance of each component and the importance of timing and cost/benefit analysis are emphasized.

Reservoir management models for optimum field development and field operating plans are analysed.

The interdisciplinary reservoir management approach shows how each technology or function contributes to the plan and how checks and balances are developed.

COURSE OBJECTIVE

Upon successful completion of this course, the delegates will be able to:

- ✓ Apply the principles of sound reservoir management.
- ✓ Use the interdisciplinary synergistic approach to efficient reservoir management.

- ✓ Include each reservoir management component and the importance of timing and cost/benefit analysis.
- ✓ Develop checks and balances.

COURSE AUDIENCE

Engineers who are part of the Reservoir Engineering department & Geologists

COURSE CONTENT

DAY 1

- Definition of reservoir management: an integrated, interdisciplinary team effort
- Goal setting, planning, implementing, monitoring, and evaluating reservoir performance

DAY 2

- Field development and field operating plans to optimize profitability efficient monitoring of reservoir performance
- Minimizing the drilling of unnecessary wells
- Wellbore and surface systems

DAY 3

- Well testing and automated production systems
- Economic impact of operating plans
- Identifying and acquiring critical data, data acquisition, and analysis

DAY 4

- Maximizing economic recovery and minimizing capital investment, risk and operating expenses
- Timing of field implementation of reservoir management plan
- Case histories and analysis

DAY 5

- Importance of reservoir characterization and drilling and operating plans
- Primary recovery, pressure maintenance, and secondary and tertiary recovery

COURSE CERTIFICATE

TRAINIT ACADEMY will award an internationally recognized certificate(s) for each delegate on completion of training.

COURSE FEES

£5,750 per Delegate. This rate includes participant's manual, Hand-Outs, buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

COURSE METHODOLOGY

The training course will be highly participatory and the course leader will present, guide and facilitate learning, using a range of methods including formal presentation, discussions, sector-specific case studies and exercises. Above all, the course leader will make extensive use of real-life case examples in which he has been personally involved. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Case studies & Practical Exercises
- 10% Role Play
- 10% Videos, Software or Simulators (as applicable) & General Discussions
